Introduction to the 2023-2024 Sustainable Development Strategy Report

The 2022 to 2026 Federal Sustainable Development Strategy (FSDS) presents the Government of Canada's sustainable development goals and targets, as required by the *Federal Sustainable Development Act*. This is the first FSDS to be framed using the 17 Sustainable Development Goals (SDGs) of the United Nations 2030 Agenda and provides a balanced view of the environmental, social and economic dimensions of sustainable development.

In accordance with the purpose of the Act, to make decision-making related to sustainable development more transparent and accountable to Parliament, The Jacques Cartier and Champlain Bridges Incorporated (JCCBI or the Corporation) supports the goals laid out in the FSDS through the activities described in its 2023 to 2027 Sustainable Development Strategy (SDS). This Report provides a progress related to JCCBI's SDS in the fiscal year 2023-2024.

The *Federal Sustainable Development Act* also sets out [7 principles](#) that must be considered in the development of the FSDS as well as SDSs. These basic principles have been considered and incorporated in the Corporation's SDS and 2023-2024 SDS Report.

Commitments of The Jacques Cartier and Champlain Bridges Incorporated

GOAL 9: FOSTER INNOVATION AND GREEN INFRASTRUCTURE IN CANADA

SDS context:

Innovation is in JCCBI's DNA and the Corporation has been fostering innovation and green infrastructure through research and development projects since 2016. These projects study and assess green alternatives to certain materials and practices. Such alternatives include adding glass powder to concrete as a replacement for a portion of the cement, using alternative materials to traditional de-icing salts and improving snow removal methods across the JCCBI network.

Modernizing and adapting infrastructure to make it sustainable is another goal pursued by the Corporation. To this end, JCCBI evaluates the seismic performance of its structures as part of sound asset management to extend their service life.

Target theme: Green infrastructure and innovation

Target: By fiscal year 2027 to 2028, the federal share of the value of green infrastructure projects approved under the Investing in Canada Plan will reach \$27.6 billion (Minister of Housing, Infrastructure and Communities Canada)

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
Invest in green infrastructure	Develop knowledge on the use of glass powder in concrete through the participation of JCCBI in the SAQ Chair for the Valorization of Glass in Materials and carry out 2 pilot projects	<p>Performance indicator: % of completion of the development and internal communication of an information sheet on the use of glass powder in concrete</p> <p>Starting point: No information sheet on the use of glass powder in concrete in 2023-2024</p> <p>Target: Development of employee knowledge on the use of glass powder in concrete by developing and communicating an information sheet by March 31, 2027</p>	<p>The environmental footprint of glass has been a major issue for a number of years in Quebec: most of the recovered glass cannot be appropriately processed by the sorting centres and as a result, is routed to landfill sites.</p> <p>The SAQ Chair is studying the possibility of replacing a fraction of the cement that enters concrete so as to develop glass recovery and reduce the environmental impact of concrete manufacturing. The results of this work could allow JCCBI to improve its future projects and make them greener.</p>	<p>Indicator result: Results available in 2024-2025</p> <p>Notes: Compilation of the information to be integrated in the information sheet is in progress.</p>
		<p>Performance indicator: % of completion of pilot projects</p> <p>Starting point: No pilot project carried out in 2023-2024</p> <p>Target: Completion of 2 pilot projects by March 31, 2027</p>		<p>Indicator result: 40% completion of the first pilot project and 0 % completion of the second pilot project in 2023-2024</p> <p>Notes: The first pilot project will possibly be included in the deconstruction of the Jacques Cartier Plaza. The elements for which glass powder could be used (slab, sidewalks, curbs) will be determined, as the case may be, at a checkpoint at 60 % design completion, which is scheduled for July 2024.</p>

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
	Study alternatives to conventional de-icing salts, particularly potassium formate	<p>Performance indicator: % of study completion</p> <p>Starting point: 25% in 2023–2024</p> <p>Target: 100% of the study completed by December 31, 2024</p>	<p>The adverse effects of de-icing salts on the environment, and on infrastructure concrete and steel surfaces are known.</p> <p>Studying the use of potassium formate as conventional de-icing salt replacement will make it possible to validate its performance, lower environmental impact, and its effects on the various elements of the structures managed by JCCBI.</p> <p>Reduced use of conventional de-icing salts on the assets in the future will slow down their deterioration, thereby reducing the repair and maintenance work required.</p>	<p>Indicator result: 60% completion in 2023-2024</p> <p>Notes: The study, conducted in collaboration with the Université du Québec à Chicoutimi (UQAC), provides an opportunity to compare alternatives to de-icing salts, including potassium formate, and to validate their laboratory performance in order to identify their impact on the environment, steel and concrete.</p>
	Continue seismic performance evaluation studies and analysis of the environmental benefits of seismic performance improvement scenarios (consolidation vs. reconstruction) for the Jacques Cartier Bridge	<p>Performance indicator: % of completion of seismic performance evaluation studies</p> <p>Starting point: 50% in 2023–2024</p> <p>Target: 100% of the seismic performance evaluation studies completed by March 31, 2027</p>	Through these studies, knowledge will be acquired to determine the actions to be implemented, if necessary, to improve the seismic performance of the Jacques Cartier Bridge, thereby reducing the adverse impact of such natural events on the infrastructure.	<p>Indicator result: 100% completion in 2023-2024</p> <p>Notes: Following the studies, 2 engineering contracts were awarded for reinforcement work on the Jacques Cartier Bridge to improve its seismic performance.</p>

GOAL 10: ADVANCE RECONCILIATION WITH INDIGENOUS PEOPLES AND TAKE ACTION ON INEQUALITY

SDS context:

For a number of years, JCCBI has been collaborating with the Mohawk First Nation of Kahnawà:ke in planning the rehabilitation and maintenance work on the federal section of the Honoré Mercier Bridge. Work on this section of the bridge is carried out by First Nations contractors and workers, in line with Order in Council P.C. 2675 dated December 7, 1932. Supporting First Nations in developing and promoting their expertise is of utmost importance to JCCBI.

Increasing awareness of internal collaborators to issues related to Indigenous peoples and developing their cultural competency skills and knowledge in this regard, as well as JCCBI's collaborative and inclusive approach with the Mohawk Council of Kahnawà:ke, Indigenous contractors and the community are examples of actions to facilitate reconciliation.

Target theme: Advancing reconciliation with First Nations, Inuit, and the Métis communities

Target: Between 2023 and 2026, and every year on an ongoing basis, develop and table annual progress reports on implementing the *United Nations Declaration on the Rights of Indigenous Peoples Act* (Minister of Justice and Attorney General of Canada)

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
Implement the <i>United Nations Declaration on the Rights of Indigenous Peoples Act</i>	Enhance knowledge about Indigenous peoples through training for internal collaborators	<p>Performance indicator: % of completion of training plan</p> <p>Starting point: New initiative scheduled to be launched in April 2024</p> <p>Target: 100% of training plan completed by March 31, 2026</p>	With a view to facilitating exchanges with First Nations, JCCBI aims to develop the cultural knowledge and competency skills of employees and their awareness of issues related to Indigenous peoples through training in the form of information sessions, guides, etc.	<p>Indicator result: No result available</p> <p>Notes: This progress report covers results up to March 31, 2024. The initiative is scheduled to start after this date.</p> <p>It should be noted that a training session entitled “Les clés pour développer des relations en contexte autochtone” aimed at Board members was planned in 2023-2024.</p>
	Maintain communication with the Mohawk Council of Kahnawà:ke (MCK) and/or the community in the planning of work on the Honoré Mercier Bridge and development projects on land bordering Mohawk territory	<p>Performance indicator: Release of a review of the collaborative meetings with the MCK and the community in JCCBI’s annual report</p> <p>Starting point: First review included in the 2023-2024 Annual report</p> <p>Target: 1 review annually in JCCBI’s annual report</p>	<p>The principle of free, prior and informed consent (FPIC) of the <i>United Nations Declaration on the Rights of Indigenous Peoples</i> is to work with Indigenous peoples in partnership and respect and aims in particular to achieve the effective and meaningful participation of Indigenous peoples in decisions that affect them.</p> <p>Promoting communication and collaboration mechanisms with a view to maintaining a relationship of mutual respect allows JCCBI to advance reconciliation with Indigenous peoples and implement the <i>United Nations Declaration on the Rights of Indigenous Peoples Act</i>.</p>	<p>Indicator result: Results available in 2024-2025</p> <p>Notes: As at March 31, 2024, JCCBI’s Annual Report was in the drafting phase.</p> <p>In 2023-2024, regular coordination meetings were held with the MCK in the planning of work on the Honoré Mercier Bridge and development projects on land bordering the Mohawk territory.</p>

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
	Plan and implement artistic projects highlighting the skills of First Nations artists	<p>Performance indicator: Number of artistic projects implemented</p> <p>Starting point: 1 project launched in 2017</p> <p>Target: 3 projects by March 31, 2027, including the project launched in 2017</p>	JCCBI promotes the development of Indigenous peoples’ cultural expression through visual arts designed by First Nations artists.	<p>Indicator result: 2 projects implemented as at March 31, 2024: 1 project in 2023-2024 and 1 project in 2017</p> <p>Notes: These projects promote Mohawk art by reproducing works from Indigenous artists on banners installed on the Honoré Mercier Bridge. As part of the 2023-2024 project, 11 banners were installed on the bridge from July to November 2023. JCCBI plans on reinstalling these 11 banners in the spring of 2024 to continue its collaboration with the Mohawk First Nation of Kahnawà:ke.</p> <p>This initiative was shared by JCCBI through its Website and social media.</p>
	Collaborate with contractors from the Mohawk First Nation of Kahnawà:ke on Honoré Mercier Bridge maintenance and rehabilitation work	<p>Performance indicator: % of contracts awarded to contractors from the Mohawk First Nation of Kahnawà:ke for Honoré Mercier Bridge maintenance and rehabilitation work</p> <p>Starting point: Ongoing</p> <p>Target: 100% of contracts awarded to contractors from the Mohawk First Nation of Kahnawà:ke</p>	JCCBI helps drive the Mohawk First Nation of Kahnawà:ke’s economy through its Honoré Mercier Bridge maintenance and rehabilitation contracts, which are performed by Kahnawà:ke contractors and workers.	<p>Indicator result: In 2023-2024, 100% of contracts for the Honoré Mercier Bridge maintenance and rehabilitation work were awarded to contractors from the Mohawk First Nation of Kahnawà:ke.</p> <p>Notes: Ongoing collaboration with First Nations</p>

GOAL 11 IMPROVE ACCESS TO AFFORDABLE HOUSING, CLEAN AIR, TRANSPORTATION, PARKS, AND GREEN SPACES, AS WELL AS CULTURAL HERITAGE IN CANADA

SDS context:

Developing active mobility lanes and public spaces is now an essential component of infrastructure rehabilitation projects, including JCCBI projects under development or in progress. Over the next few years, JCCBI will undertake a number of major projects, including the Bonaventure Expressway reconfiguration, which will propose a waterfront promenade and active mobility lanes, and the development of freed up shoreland following the deconstruction of the original Champlain Bridge (Héritage Champlain project). JCCBI will also carry out studies to enhance the active mobility offering in the axis of the Clément Bridge. The objective of these projects is for a better connection with nature and green spaces and to provide Canadians with reliable, fast and affordable ways to get around.

Target theme: Public Transit and Active Transportation

Target: By 2030, 22% of commuters use public transit or active transportation (Minister of Housing, Infrastructure and Communities Canada)

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
Invest in public transit and active transportation	Build a bike link on the south approach of the Samuel De Champlain (SDC) Bridge in Brossard to connect the existing local bicycle path network to the SDC Bridge multifunctional path	<p>Performance indicator: % of completion of bike link construction</p> <p>Starting point: Construction not started. Work scheduled to begin in May 2025</p> <p>Target:</p>	Transportation modes are changing, and users need various transportation alternatives to choose those that best suit their needs. JCCBI conducts studies to assess potential active mobility improvements on its structures and, as the case may be, build them subject to the required approvals.	<p>Indicator result: No result available</p> <p>Notes: Construction is still scheduled to begin in 2025.</p>

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
		100% of bike link is built by December 31, 2025		
	Increase the Estacade active mobility offering and traffic	<p>Performance indicator: % of completion of the project to transfer the Estacade bike link to its main deck, to increase the service offering</p> <p>Starting point: The bike link transfer project is not yet underway in 2023-2024</p> <p>Target: 100% completion of the project to transfer the Estacade bike link to the main deck by March 31, 2027</p>		<p>Indicator result: No result available</p> <p>Notes: The preliminary step to transferring the bike link to the Estacade main deck is the development of the Île des Sœurs and Estacade shorelines as part of the Héritage Champlain project. The development work will be carried out in 2024 and 2025.</p>
		<p>Performance indicator: % of increase in traffic</p> <p>Starting point: 135,810 active mobility crossings in 2022-2023</p> <p>Target: 15% increase in mobility crossings by March 31, 2029</p>		<p>Indicator result: Results available in 2027-2028</p> <p>Notes: The results for this indicator will only be available once the bike link has been transferred to the Estacade main deck.</p>
	Conduct preliminary project studies to develop a new active mobility lane built mainly out of deconstruction materials in	<p>Performance indicator: % of completion of preliminary project studies</p>		<p>Indicator result: Results available in 2024-2025</p>

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
	the axis of the Clément Bridge, to connect the SDC Bridge bicycle path to the bicycle path on the future Bonaventure urban boulevard promenade	<p>Starting point: Studies not underway Studies scheduled to begin in October 2023</p> <p>Target: 100% of studies completed by March 31, 2026</p>		<p>Notes: As at March 31, 2024, the request for proposals for the professional services contract to conduct the preliminary project studies was underway.</p>
	Propose the development of a new bike link on the Clément Bridge to the authorities through a business case	<p>Performance indicator: Progress in integrating the business case proposal into JCCBI's Corporate Plan</p> <p>Starting point: Development of the business case in 2021–2022</p> <p>Target: Propose the business case in JCCBI's Corporate Plan for 2024–2025 to 2028–2029</p>		<p>Indicator result: 100% completion in 2023-2024</p> <p>Notes: The business case was presented as part of the 2024-2025 to 2028-2029 Corporate Plan. Studies will be conducted as part of Preliminary Project ABAP0017- "Bonaventure Expressway, Section 13, Construction of a Multifunctional Footbridge in the Clément Bridge Axis", which was launched in November 2023.</p>
Propose the development of bicycle and pedestrian paths along the St. Lawrence River as part of the Bonaventure Expressway reconfiguration	<p>Performance indicator: % of completion of bicycle and pedestrian path design</p> <p>Starting point: Design not underway Bicycle and pedestrian path design scheduled to begin in 2024–2025</p> <p>Target:</p>	<p>Indicator result: 60% completion in 2023-2024</p> <p>Notes: The design of the bicycle and pedestrian paths along the St. Lawrence River, as part of the Bonaventure Expressway reconfiguration, is progressing according to plan. The Starting point and Target</p>		

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
		100% of bicycle and pedestrian path design completed by March 31, 2027		dates will be corrected in the January 2025 SDS update.

Target theme: Green spaces, Cultural and Natural Heritage

Target: Designate national urban parks as part of a network, with a target of up to 6 new national urban parks by 2026 and a total of 15 new national urban parks by 2030 (Minister of Environment and Climate Change)

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
Develop green spaces close to urban centres	Propose the development of a waterfront promenade along the St. Lawrence River as part of the Bonaventure Expressway reconfiguration	<p>Performance indicator: % of completion of promenade design</p> <p>Starting point: Design not underway Promenade design scheduled to begin in 2024–2025</p> <p>Target: 100% of promenade design completed by March 31, 2027</p>	JCCBI promotes the development of, and access to, green spaces through projects that return the banks of the St. Lawrence River to Canadians by planning public spaces and active mobility lanes. The Corporation undertakes greening initiatives for the land under its management and to enhance ecosystems.	<p>Indicator result: 60% completion in 2023-2024</p> <p>Notes: The design of a waterfront promenade (now called green corridor) along the St. Lawrence River, as part of the Bonaventure Expressway reconfiguration, is progressing according to plan. The Starting point and Target dates will be corrected in the January 2025 SDS update.</p>

Target: By 2026, support at least 23.7 million visitors annually to Parks Canada places (Minister of Environment and Climate Change)

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
Promote access to green space, cultural and natural heritage	Develop freed up shoreland following the deconstruction of the original Champlain Bridge as part of the Héritage Champlain project	<p>Performance indicator: % of completion of development work</p> <p>Starting point: Work not underway Work scheduled to begin in April 2024</p> <p>Target: 100% by March 31, 2026</p>	JCCBI promotes the development of, and access to, green spaces through projects that return the banks of the St. Lawrence River to Canadians by planning public spaces and active mobility lanes. The Corporation undertakes greening initiatives for the land under its management and to enhance ecosystems.	<p>Indicator result: No result available</p> <p>Notes: Construction is still scheduled to begin in fiscal year 2024-2025. The stakeholder consultation on the layout of the active mobility lanes has resulted in the design of a project that will be well integrated with existing networks.</p>

GOAL 12: REDUCE WASTE AND TRANSITION TO ZERO-EMISSION VEHICLES

SDS context:

In recent years, JCCBI has been developing an environmental management system (EMS). The goal is to enable the Corporation to assess the consequences of its operations on the environment to reduce their negative impacts. The EMS is scheduled to be deployed gradually starting in 2023–2024. Once implemented, the EMS will allow for the monitoring of the waste generated by JCCBI maintenance and rehabilitation projects and facilitate monitoring of contaminated sites.

In transforming its light-duty fleet to a greener fleet, JCCBI has opted for a strategy of extending service lives and optimizing vehicles currently in operation before considering purchasing hybrid or electric vehicles.

Target theme: Federal Leadership on Responsible Consumption

Target: By 2030, the Government of Canada will divert from landfill at least 75% by weight of non-hazardous operational waste (All Ministers)

Target: By 2030, the Government of Canada will divert from landfill at least 90% by weight of all construction and demolition waste (All Ministers)

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
Maximize diversion of waste from landfill	Continue selective collection (recycling) in JCCBI offices	Performance indicator:	Implementing selective collection in the administrative offices is feasible and allows waste to be diverted from landfills. JCCBI	Indicator result: 100% completion in 2023-2024

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
		% of JCCBI offices with selective collection Starting point: 66% of offices have selective collection in 2023–2024 Target: 100% of offices have selective collection by March 31, 2024	offices are distributed in 3 locations, 2 of which have selective collection. To date, JCCBI maintenance centre is not equipped with selective collection. For 2023–2024, the goal will be to implement and monitor this action.	Notes: The acquisition of specialized equipment and the implementation of team awareness programs have facilitated the effective integration of selective collection at JCCBI’s maintenance centre.
	Ensure 2 types of waste (metal and construction debris) generated by Operations and Maintenance team activities are properly disposed of	Performance indicator: % of completion of the implementation of a traceability system to ensure proper disposal of the 2 types of waste Starting point: New initiative scheduled for launch in May 2024 Target: 100% of the traceability system implemented by March 31, 2025	The Corporation uses recyclers for the responsible diversion of metal and construction debris (e.g., asphalt and concrete) from the Operations and Maintenance Division activities. In 2024–2025, the Corporation will follow up with these recyclers to ensure recycling processes comply with best practices in the field.	Indicator result: No result available Notes: This progress report covers results up to March 31, 2024. The initiative is scheduled to start after this date.
	Implement environmental management system (EMS) component systems to collect data on waste generated by administrative activities	Performance indicator: % of completion of the data collection process Starting point: New initiative launched in September 2023 Target:	To date, data on waste generated by JCCBI activities is not consolidated in a common registry. Without an overall snapshot of the quantity of waste generated, it is not possible to set diversion rates to maximize waste diversion. Implementing an environmental management system (EMS) over the next few years will facilitate establishing a registry for monitoring the amount of waste generated. This work will be performed collaboratively across the Corporation’s various divisions.	Indicator result: 5% completion in 2023-2024 Notes: Internal meetings were held in preparation for the implementation of the environmental management system (EMS) scheduled for the fall of 2024.

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
		100% completion of the data collection process by March 31, 2027		

Target: The Government of Canada’s procurement of goods and services will be net-zero emissions by 2050, to aid the transition to a net-zero, circular economy (All Ministers)

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
Transform the federal light-duty fleet	Extend and optimize the service life of the light-duty fleet	<p>Performance indicator: % of fleet vehicles that are light-duty vehicles over 7 years old</p> <p>Starting point: 33% (6 out of 18 vehicles) of fleet vehicles are light-duty vehicles over 7 years old in 2023–2024</p> <p>Target: 44% (8 out of 18 vehicles) by March 31, 2025 83% (15 out of 18 vehicles) by March 31, 2027</p>	<p>Before replacing combustion vehicles with new electric or hybrid vehicles, the Corporation will first take steps to maximize fleet vehicle service lives through regular preventive maintenance. The goal is to minimize the environmental impact of the fleet vehicle life cycle.</p> <p>Gradual purchases of electric and/or hybrid vehicles will be considered in a second phase to replace combustion vehicles.</p>	<p>Indicator result: As at March 31, 2024, 44% of the vehicle fleet is made up of light-duty vehicles over 7 years old.</p> <p>Notes: The new internal policy for vehicle fleet renewal aims to extend the service life of vehicles beyond 7 years, to reduce the environmental impact of the fleet life cycle.</p>
	Favour the purchase of electric and/or hybrid vehicles over combustion vehicles for fleet	<p>Performance indicator: % of fleet vehicles that are hybrid and/or electric light-duty vehicles</p>		<p>Indicator result: The new data will be available in 2024-2025.</p>

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
	renewal where deemed appropriate for the intended use	<p>Starting point: 28% (5 out of 18 vehicles) in 2023–2024</p> <p>Target: 50% (9 out of 18 vehicles) by March 31, 2027</p>		<p>Notes: No vehicles were purchased during fiscal year 2023-2024.</p> <p>The organization is adapting its facilities by installing charging stations in anticipation of the future acquisition of electric and plug-in hybrid vehicles.</p>
Strengthen green procurement criteria	Ask suppliers to submit their environmental or sustainable development policy when bidding on construction contracts	<p>Performance indicator: % of suppliers targeted by the action who have submitted a policy</p> <p>Starting point: New initiative scheduled for launch in 2025–2026</p> <p>Target: 75% of suppliers targeted by the measure to have submitted a policy by 2027–2028</p>	This action strives to ensure JCCBI suppliers are engaged in and ready for environment and sustainable development continuous improvement.	<p>Indicator result: No result available</p> <p>Notes: This progress report covers results up to March 31, 2024. The initiative is scheduled to start after this date.</p>
	Update the green procurement criteria catalogue	<p>Performance indicator: % of completion of catalogue update</p> <p>Starting point: New initiative scheduled for launch in 2024–2025</p> <p>Target: 100% of the catalogue update completed by March 31, 2025</p>	Inspired by Public Services and Procurement Canada (PSPC) criteria, improving green and responsible procurement criteria involves incorporating environmental and social criteria into contracts where possible.	<p>Indicator result: No result available</p> <p>Notes: This progress report covers results up to March 31, 2024. The initiative is scheduled to start after this date.</p>
	Integrate green procurement criteria into standardized construction specifications	<p>Performance indicator: % of green procurement criteria that have been integrated into JCCBI standardized construction specifications</p>		<p>Indicator result: No result available</p> <p>Notes:</p>

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
		<p>Starting point: New initiative scheduled for launch in 2024-2025</p> <p>Target: 80% of green procurement criteria to have been integrated into JCCBI standardized construction specifications by 2027-2028</p>		<p>This progress report covers results up to March 31, 2024. The initiative is scheduled to start after this date.</p>

Implementation strategies supporting the goal

This section is for implementation strategies that support the goal “Reduce waste and transition to zero-emission vehicles” but not a specific FSDS target

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
Remediate high-priority contaminated sites	Take action so that the sites registered on the Federal Contaminated Sites Inventory (FCSI) progress within the decision-making framework (1 to 10) of the Federal approach to contaminated sites	<p>Performance indicator: Number of sites having progressed to Stage 6 or higher of the decision-making framework</p> <p>Starting point: 6 out of 19 sites in 2022–2023</p> <p>Target: 19 sites by March 31, 2027</p>	<p>The Corporation is one of the custodians that obtain funding from the Federal Contaminated Sites Action Plan (FCSAP). The Corporation carries out an inventory of all the land under its management to classify its environmental condition and prioritize interventions when required.</p> <p>In 2022–2023, the Corporation’s portfolio had 19 sites whose soils may be contaminated beyond acceptable criteria: the remediation of 1 site was completed in 2021–2022.</p> <p>The actions listed in this section will either remediate these high-priority contaminated sites or implement a risk management strategy and long-term monitoring, with the aim of reducing and better managing risks to human and environmental health.</p>	<p>Indicator result: The new data will be available in 2024-2025.</p> <p>Notes: Although there has been no progress regarding the target, actions were taken in 2023-2024 allowing some sites to progress towards Stage 6 of the decision-making framework.</p>
	Close or ensure that JCCBI-managed contaminated sites are subject to long-term monitoring	<p>Performance indicator: Number of contaminated sites closed or under long-term monitoring</p> <p>Starting point: 1 site was closed or under long-term monitoring in 2021–2022</p> <p>Target: 6 contaminated sites are subject to a closure report or long-term monitoring by March 31, 2027</p>		<p>Indicator result: The new data will be available in 2024-2025.</p> <p>Notes: 1 site is currently in the process of being closed. Analyses are underway at the other sites to determine whether they should be closed. A site closure plan is currently in preparation.</p>
	Take action to reduce 2022–2023 environmental liabilities	<p>Performance indicator: % reduction in environmental liabilities</p> <p>Starting point: \$143,645,000 in 2022–2023</p> <p>Target: The target for this action will be determined in the coming years</p>		<p>Indicator result: 2.25% reduction in 2023-2024</p> <p>Notes: This decrease in environmental liabilities is mainly due to changes in the discount and inflation rates, as well as to remediation expenditures incurred during the period.</p>

GOAL 13: TAKE ACTION ON CLIMATE CHANGE AND ITS IMPACTS

SDS context:

In order to set greenhouse gas (GHG) reduction targets, JCCBI must first have an overall and comprehensive snapshot of the GHGs emitted by its operations. Accordingly, over the past 3 years, a snapshot has been drawn up to first identify key GHG generators: a GHG reduction plan will be developed in a second phase, thereby supporting the Government of Canada's commitment to achieve net-zero emissions by 2050. Awareness-raising and training activities are also planned to make internal collaborators aware of the environmental impacts related to human activities.

Ensuring that the assets under its management are resilient to climate change remains a growing concern for JCCBI. An approach to integrating climate-change-related risks into JCCBI business processes, based on the Task Force on Climate-related Financial Disclosures (TCFD) framework, is being implemented.

Target theme: Federal Leadership on Greenhouse Gas Emissions Reductions and Climate Resilience

Target: The Government of Canada will transition to net-zero carbon operations for facilities and conventional fleets by 2050 (All Ministers)

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
Implement the Greening Government Strategy through measures that reduce greenhouse gas emissions, improve climate resilience, and green the government’s overall operations	Disclose JCCBI Scope 1 and Scope 2 greenhouse gas (GHG) emissions data on JCCBI website	<p>Performance indicator: Data disclosed annually</p> <p>Starting point: New initiative scheduled for launch in November 2023</p> <p>Target: 100% of data disclosed annually</p>	To reduce its GHG emissions, JCCBI must first draw up a GHG emissions snapshot. JCCBI will develop a GHG reduction and decarbonization plan, and actions will have to be prioritized and implemented to achieve the Government of Canada’s reduction targets.	<p>Indicator result: Results available in 2024-2025</p> <p>Notes: This action is slightly behind schedule. Although JCCBI has not published the data for 2023-2024, carbon footprint analyses are underway.</p>
	Develop a decarbonization action plan to reduce GHG Scopes 1 and 2	<p>Performance indicator: % of completion of the decarbonization action plan</p> <p>Starting point: 0% as at May 1, 2023</p> <p>Target: 100% completion of the action plan with 3 to 5 specific decarbonization actions by March 31, 2027</p>		<p>Indicator result: 30% completion in 2023-2024</p> <p>Notes: A preliminary action plan based on the data for 2022-2023 has been issued, including the main Scope 1 and Scope 2 GHG reduction measures.</p>
	Organize awareness-raising activities with employees on environment and sustainable development themes	<p>Performance indicator: Gauge employees’ understanding of environment and sustainable development issues following awareness-raising activities by conducting a survey</p> <p>Starting point: New initiative scheduled to be launched in April 2024</p> <p>Target:</p>		<p>Indicator result: No result available</p> <p>Notes: This progress report covers results up to March 31, 2024. The initiative is scheduled to start after this date.</p>

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
		Gauge employee understanding of environment and sustainable development issues through a survey to be conducted by March 31, 2027	biodiversity, contaminated land management and climate resilience.	
	Participate in environment and sustainable development communities of practice	<p>Performance indicator: Number of information sheets developed and communicated internally based on the knowledge acquired as part of the communities of practice</p> <p>Starting point: New initiative scheduled for September 2024</p> <p>Target: 4 factsheets communicated by March 31, 2027</p>	<p>CCBI employee participation in communities of practice with municipalities and provincial departments, First Nations, the transportation and mobility industry, academia, and other institutional partners to achieve common environmental goals helps the Corporation share and stay abreast of environment and sustainable development best practices.</p> <p>JCCBI employees participate in the following communities of practice:</p> <ul style="list-style-type: none"> - SAQ Chair for the Valorization of Glass in Materials, Université de Sherbrooke; - Table d'expertise Mobilité durable, Association québécoise des transports (AQTr); - Table d'expertise ferroviaire, AQTr; - Canadian Highway Bridge Design Code (CSA S6) Regulatory Authority Committee; - Envision Community of Practice; - Crown Corporations Greening Community of Practice, Treasury Board of Canada. 	<p>Indicator result: No result available</p> <p>Notes: This progress report covers results up to March 31, 2024. The initiative is scheduled to start after this date.</p>

Target: The Government of Canada will transition to climate resilient operations by 2050(All Ministers)

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
Reduce risks posed by climate change to federal assets, services and operations	Update the climate-change-related risks for JCCBI assets	Performance indicator: % of update completion Starting point: 50% as at May 1, 2023 Target: 100% by December 31, 2023	Reviewing the risks posed by climate change to JCCBI infrastructure and their integration into prioritized corporate risks will optimize risk monitoring and implementing appropriate mitigation measures.	Indicator result: 100% completion in 2023-2024 Notes: A list of the climate change-related risks to JCCBI assets has been defined.
	Integrate climate-change-related risks into JCCBI's prioritized corporate risks	Performance indicator: % of completion of the integration process Starting point: New initiative launched in September 2023 Target: 100% by March 31, 2025		Indicator result: 100% completion in 2023-2024 Notes: N/A
	Integrate climate-change-related risks into projects factsheets at the planning stage, where applicable	Performance indicator: % of completion of the integration process Starting point: New initiative launched in September 2023 Target: 100% by March 31, 2026		Indicator result: Results available in 2024-2025 Notes: Where applicable, climate change-related risks are incorporated into project factsheets at the time of their annual review.
	Develop a climate change resilience plan as part of JCCBI's climate-related financial disclosures, based on the framework of	Performance indicator: % of completion of resilience plan		Indicator result: 50% completion in 2023-2024

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
	the Task Force on Climate-related Financial Disclosures (TCFD)	Starting point: 5% in May 2023-2024 Target: 100% by December 31, 2024	reduce climate-change-related risks and increase the climate change resilience of JCCBI assets.	Notes: The risks associated with climate change have been identified by structure. The mitigation measures, prioritization thereof and costs have yet to be defined.

GOAL 15: PROTECT AND RECOVER SPECIES, CONSERVE CANADIAN BIODIVERSITY

SDS context:

The first step in reducing the environmental impacts of JCCBI’s operations is to understand the environment the assets are operated in. Every 5 years, plant and wildlife inventories are carried out by teams of biology specialists. Biological monitoring is also carried out on ecosystem compensation projects for wildlife habitats, including the fish habitat, to assess the effectiveness and sustainability of the initiatives implemented over time. Biodiversity management action plans aimed at restoring and protecting wildlife and flora are scheduled in the next few years.

Target theme: Conservation of Land and Fresh Water

Target: Between 2023 and 2026, Canada’s sustainable wood supply level (guided by sustainable forest management policies to reflect the current unique social, environmental and economic characteristics of managed forests), exceeds the annual timber harvests (Minister of Natural Resources)

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
Better understand lands and forests	Monitor special-interest species	<p>Performance indicator: Number of species monitored</p> <p>Starting point: 2 species monitored in 2022–2023</p> <p>Target: 3 species monitored by March 31, 2027</p>	Biodiversity inventories carried out by JCCBI every 5 years enhance ecosystem health knowledge. They allow monitoring of special-interest species, namely cliff swallows, peregrine falcons and eventually brown snakes, to learn about their behaviour and populations and measure the effectiveness of the	<p>Indicator result: The new data will be available in 2024-2025.</p> <p>Notes: JCCBI has maintained annual monitoring of cliff swallows and peregrine falcons nesting on the structures, but no other species have been added to the monitoring activities in 2023-2024. In 2023-2024, the first version of the action plans was finalized as part of the</p>

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
			compensation and protection measures put in place.	<p>Corporation’s strategic plan for the preservation and enhancement of the territory ecosystems (2021-2024).</p> <p>A master plan will be prepared for each structure, aimed at protecting biodiversity, controlling and combating invasive alien species (IAS), protecting shorelines and greening and revegetating spaces, with a view to ensuring their resilience to the effects of climate change, enhancing their biological functions and contributing to the socio-economic development by improving and organizing the public space. As part of the strategy, inventories were carried out in 2022, and an additional study was added in 2024 for the Melocheville tunnel sector. The next monitoring inventories are scheduled for 2027.</p>
	Carry out biological monitoring of restored sites	<p>Performance indicator: Number of biological monitoring campaigns carried out</p> <p>Starting point: New initiative scheduled to be launched in April 2024</p> <p>Target: 3 campaigns by March 31, 2028</p>	Biological monitoring of restored sites subsequent to JCCBI construction activities aims to assess mitigation and compensation measure effectiveness and sustainability to better understand land and forests and how projects impact the environment.	<p>Indicator result: 1 biological monitoring campaign carried out in 2023-2024</p> <p>Notes: The first biological monitoring campaign to assess fish habitat was undertaken as part of a compensation project in St-Ignace-de-Loyola.</p>

Target theme: Species Protection and Recovery

Target: By 2026, increase the percentage of species at risk listed under federal law that exhibit population trends that are consistent with recovery strategies and management plans to 60%, from a baseline of 42% in 2019 (Minister of Environment and Climate Change; Minister of Fisheries, Oceans and the Canadian Coast Guard)

IMPLEMENTATION STRATEGY	ACTION	PERFORMANCE INDICATOR STARTING POINT TARGET	HOW THE ACTION CONTRIBUTES TO THE FSDS GOAL AND TARGET	RESULTS ACHIEVED
Deliver enhanced conservation action	Continue to monitor nesting, and develop an annual management plan for cliff swallows and peregrine falcons that is adapted to the construction work	<p>Performance indicator: Develop an annual management plan</p> <p>Starting point: 1 management plan has been developed annually since 2012</p> <p>Target: 1 management plan developed annually</p>	Since 2012, JCCBI has been monitoring the populations of cliff swallows and peregrine falcons that nest on its infrastructure. An annual management plan helps protect and conserve these species.	<p>Indicator result: 1 management plan developed in 2023-2024</p> <p>Notes: The annual management plan contributes to the protection and conservation of these 2 species.</p>
	Carry out fish habitat compensation projects near the original Champlain Bridge deconstruction area	<p>Performance indicator: % of compensation projects completion</p> <p>Starting point: New initiative scheduled to begin in September 2024</p> <p>Target: 100% of the projects completed by December 31, 2025</p>	The original Champlain Bridge deconstruction work, which has been ongoing since 2020, has had important impacts on fish habitat, owing notably to the installation of temporary jetties. Compensation projects are planned to create and restore calm water habitats for fish in 2 areas, namely at the Estacade and Brossard piers.	<p>Indicator result: No result available</p> <p>Notes: This progress report covers results up to March 31, 2024. The initiative is scheduled to start after this date.</p>

Integrating sustainable development

Integrating sustainable development depends above all on corporate culture: successful integration relies on all employees being aware of and knowledgeable about sustainable development concepts.

Sustainable development in projects

JCCBI's mandate is to manage, maintain and rehabilitate infrastructure such as bridges, highways and tunnels, as well as properties, to ensure a safe passage for users. The Corporation's mission is to fulfill this mandate using a systemic management approach based on sustainable development.

Accordingly, for each asset, sustainable development opportunities are analyzed at the master plan development stage. Specific sustainable development programs are then integrated into the project factsheets that define the scope of the work to be carried out. Multidisciplinary teams are set up for each project, allowing projects to be planned and carried out with a 360° view.

In terms of environmental protection, JCCBI strives to minimize operational environmental impacts and seize opportunities to improve practices. JCCBI assesses project environmental effects at the planning stage and develops and updates processes taking into account, in particular, best practices and Impact Assessment Act requirements.

Sustainable development decision-making tools are used in planning preliminary project studies, as well as in the design of construction and land development work. These tools include lists of criteria based, in particular, on Envision criteria, which are used to assess the environmental, social and economic performance of various work design scenarios.

The original Champlain Bridge deconstruction project exemplifies how sustainable development principles, including the circular economy, are integrated into JCCBI projects. The deconstruction of this bridge generated 264,000 tonnes of materials, 96% of which was recovered (reused or recycled). One reuse initiative launched by the Corporation in 2021 is a Canada-wide Material Reuse Competition to give a second life to hundreds of steel components from the bridge. Ultimately, 11 projects were confirmed and will allow the original Champlain Bridge to remain in the collective memory.

In addition, sustainable development best practices are standardized through their integration into JCCBI's standardized construction specifications.

Improving our sustainable development maturity posture

JCCBI aims to improve its sustainable development maturity posture. To this end, a three-year environment and sustainable development strategic planning is used to better direct and readjust priorities. Implementing an environmental management system (EMS) also allows JCCBI to better gauge and quantify existing practices to set short-, medium- and long-term environmental performance targets.

External corporate profile

Various external communication tools are deployed annually to showcase JCCBI's expertise and share its transportation, civil engineering, mobility and sustainable development knowledge and innovations.
